This is, without a doubt, a great little game. It's got a lovely premise and theme, and the gameplay mix between game modes (strategy and tactics) is very well balanced.

I can't recommend it, though. Its tutorial and help system is not nearly sufficient for the gameplay present. You kind of get thrown into a game and given a few tips, and you're left to figure out stuff on your own. In these days of quest markers and other player-catering behaviour, this 90's throwback to how you treat your player - an obsessive mathematics-inclined nerd - is not how to make games anymore. Don't buy it unless you're willing to put some time into learning what it's all about.

That said, I eagerly look forward to Weird and Wry's next title, and I hope they either figure out the magic of approaching players and UI design, or hire a designer to guide their methods. The Spatial has touches of genius within it, and at the same time, a voice that suggests neither brother was willing to take the spotlight and argue for the audience's experience or take responsibility for the title.. Bloo Kid 2 is a rock solid **retro 2d platformer. The make or break of any platformer is the controls and this game passes with flying colors.**

In addition to completing the level there are 6 additional challenges for each level;

- **kill all the enemies**
- **collect all the stars**
- **collect all the hidden blue stars**
- **collect the balloon at the end of the level**
- **finish in under the special time**
- **finish the level with 3 hearts. The best tower defense game I've ever played, period – and I've played well over a dozen. Seamless integration of FPS gameplay with impeccable TD mechanics. Tons of ways to create mazes, many effective tower/weapon combinations, great mix of satisfying combat and strategic planning. Unique enemies, beautiful art style and AN ABSOLUTELY FANTASTIC SOUNDTRACK!. This is a very simple game, not pretentions at all. It's definitely challenging, and some people will enjoy it. I can't recommend it cause to me it's not very interesting or fun.. This is an example of what a lot of work and detail can do with RPG Maker. I've just started playing, but it's already leaps and bounds ahead of some of the games I've seen! It doesn't bore you with a lot of story right away, but let's you PLAY the GAME! You get into the classic RPG elements immediately -- making a party, getting loot, selling stuff, exploring things, and talking to NPC's.... plus options to skip cutscenes, adjust difficulty, save wherever (only if you want!). If you're looking for an RPG Maker game that brings you back to the core elements -- and let's you actually play with them -- this is it.. Really enjoyed this game. There are a few scares, the puzzles/mini-games are great fun. The story is good and interesting. Only problem is I just wanted it to be longer!!
Great game :D**

Awesome game. if you want to make a shooting game on fire then heres your game also see a therapist. Pitchford is nothing short of filth.

Borderlands is pretty good, though.. A heads up: If you're not into reading, pass on this because there's no voice narration. Otherwise, continue reading.

I haven't made it very far, almost 1.5hrs in, but I feel I've gotten a good grasp on what this game offers. In short, it seems to be a pretty mellow game with an interesting story so far. Pick it up if you're looking for a change of pace from other games or if you're into the quieter, relaxing games.

On to the specifics:

You're helping to discover what happened to an ancient civilization while traversing inverted worlds (a pretty cool idea, imagine the perspective of a fly flying around the inside of one of those big air up balls you can find at Wal-Mart). That leads to the fisheye effect that almost prevented me from buying this. The effect is hardly noticeable when you're flying around, except when you slow way down and turn in circles (still tolerable though).

A big plus for me is the option to remap the flight controls on my controller (XB1), I mapped the roll to the left stick so pitch and roll are on the left and yaw is on the right. Originally the accelerate and decelerate were mapped to the right stick, but I remapped them to the unused trigger buttons. Once I remapped the flight controls, flight became much more intuitive for me.

So far there's a lot of reading, but it's to be expected when there's a story to tell. Also, I can imagine hiring voice actors would be pretty expensive and an indie budget may not necessarily allow for that.. The dialog text does go by pretty slow, but it can be accelerated by holding down a button (just be careful not to accidentally skip the text).

A handy feature would be an option to toggle the scrolling text it does now and switch it to instant, that would help the fast readers and also help get through dialog you've already read.

I like it so far, it's a unique game that's absolutely worth picking up, even at full price. If you're skeptical or concerned about the style of the game making you motion sick, pick it up on sale and refund it if it's not for you.. Really taught me the best way to hold my controller. Good game, have to think incredibly fast with a very charming atmosphere alongside a good and fitting soundtrack.
